

Key Ingredients

Transfer Factor XF™
 Yeast Polysaccharides
 Aloe Vera
 Lavender
 Chamomile
 Rosemary

Product Information

2 oz. (56.7g) / 30-day supply
 Item# 30025001

TF RenewAll is a revolutionary skin renewing therapy specifically formulated to keep skin healthy and soft. This advanced cell renewing formula is especially helpful for problem skin conditions, after shaving, cuts, bruises, scrapes, burns, bug bites, rashes and minor irritations. TF RenewAll helps soothe your skin while activating the skin's own immune response, thanks to powerful immune system support ingredients like Transfer Factor XF, Yeast Polysaccharides and Aloe vera.

First Immune Defense

Being the largest immune organ in the body, the skin serves as the first line of defense against the millions of invading germs that threaten our health and well-being. It provides a tough barrier that can be compromised by cuts, abrasions and other conditions.

Transfer Factor for the Skin

What are *transfer factors* and how do they work? Transfer Factor XF is a safe substance that has been used in multiple applications, including skin care. *Transfer factors* are the primary communications mechanism used by your immune system to defend your body against harmful microbial threats. *Transfer factors* are small molecules that consist of specific sequences of amino acids. These small compounds naturally occur in all mammals and are passed on from mother to newborn through the mother's first milk called colostrum. These small *transfer factor* molecules then start to educate the newborn's naive immune system, which in turn helps protect them from the microbial threats they encounter all their life.

Transfer factors have three primary functions. When we encounter a potential microbial threat, *transfer factors*:

- 1) recognize and alert our immune system to the "threat"
- 2) condition our immune system to respond quickly to "threats"
- 3) remember the threats we encounter to quickly respond in the future

Superior Immune Support for Your Skin

Yeast polysaccharides

Yeast polysaccharides are key in activating the immune system's natural defense mechanisms. They also provide excellent support for macrophages, some of the most important "soldiers" of the immune system. Yeast polysaccharides are also crucial components of the cell renewing process of the skin, helping your skin to look younger and healthier every day.

Aloe Vera

Aloe vera has been used for centuries to help repair the skin barrier from invaders and provide soothing relief. Recently, scientists have begun to validate this ancient wisdom with studies that prove aloe vera's effectiveness for the skin.

Lavender, Chamomile and Rosemary

These are skin conditioning extracts that naturally keep your skin healthy, soft and smooth.

Immune support would not be complete without proper protection for the skin. TF RenewAll is formulated for your everyday immune support needs. Use TF RenewAll everyday for better-looking healthier skin from the outside in. You'll feel and notice the difference!
